

HEALTHCARE & MEDICAL INNOVATION TOUR

The future of healthcare isn't just about the latest miracle drug. On this tour, you will learn how Augmented / Virtual Reality, 4D printing, the nanosciences and the Internet of Things are helping doctors and medical professionals treat and cure disease. In this three-day workshop you will visit innovative companies and speak to industry experts who give you a look into the future of healthcare.

Be prepared for:

- **Exponential Growth:** Science Fiction is becoming reality. You will learn how some critical technologies are growing exponentially.
- **Corporate Innovation:** You will learn how industry leaders keep up with the latest trends.
- **Expert Opinion:** We will meet some of the industry experts in the field of Healthcare and Medical Innovation discuss the future of healthcare industry. Over three days you will get to know the most exciting startups and experts from Healthcare & Medical Innovation:
